A Local Perspective** 1:00
- **Framing** 1:40
- **Breakout discussions** 2:00
- **Synthesis** 3:25
- **Wrap up and next steps** 4:00

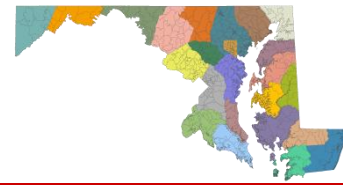

GOALS FOR TODAY

- Hear community concerns about environmental health challenges in Maryland
- Discuss ways to address those challenges
- Talk about how the State can improve:
 - Communication about environmental health issues and resources
 - Information and data
 - Training and technical assistance for communities
 - Access for communities that have not been part of the conversation

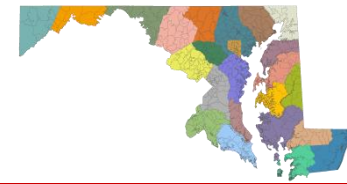

CLIMATE CHANGE

- DHMH goal – increase community resilience to climate change
- Many (or most) community concerns discussed today probably NOT about climate change, BUT
- As communities address concerns about many environmental health problems, it will help Maryland to adapt to climate change
- This is just the start of a conversation and engagement
